In my opinion, the most impressive and interesting building in the USA is the White House.

When I think of the mansion I see Forest Gump walking in front of the building and Nicolage Cage looking for directions in „National Treasure“.

The White House consists of three parts: Executive Residence, West Wing and East Wing. White House adjacent green areas, including two gardens.

The White House is a place where the most important decisions are taken. Additionally, in this building you can meet the president of the USA. The White House was designed by James Hoban in a neoclassical style. Construction was completed in 1800. The first president who live there was John Adams.

Did you know that you can see the white cover on the old \$ 20 bills.

The fun fact of the last few days is that now the first dogs will live in the mansion. Major and Champ are Joe Bidens pets.

If you are in Washington, don't forget to visit White Huse. Tours to the White House are usually organized on Fridays and Saturdays from 8:00 AM to 11:00 AM.
