## **The most impressive building in USA**

The most impressive building (maybe more building complex) is National 9/11 Memorial and Museum with New World Trade Center buildings. The complex consists of 1 World Trade Center (Freedom Tower), 2 World Trade Center, 3 World Trade Center, 4 World Trade Center and National 9/11 Memorial and Museum. Everything is place at location of demolished original World Trade Center complex in the terrorist attacks on the September 11, 2001. The highest building of new World Trade Center complex is One World Trade Center – 541 meters. It is the highest building in USA. 2 World Trade Center is still under construction. It was planned to complete construction in 2020, but many factors affected to the delay. It will be 412 meters high. 3 World Trade Center have 378 meters. The last skyscraper – 4 World Trade Center is the lowest one – 297 meters. The last part of the new World Trade Center complex is National 9/11 Memorial and Museum. Two large pools with fountains have already been built on the place of destroyed Twin Towers' foundations. The monument is a void, a negative of the former World Trade Center towers. A square planted with hundreds of oaks was created to separate visitors of the National 9/11 Memorial and Museum away from noisy city. On the monument, there are engraved names of people, who died in the terrorist attack. There is one interesting thing – Memorial Museum's workers put a white rose in the names of people, who have birthday. I drew the National 9/11 Memorial and Museum monument, because it makes the greatest impression on me. I want to talk about it – the situation and history of this place, because noone will experience these feelings and understand them, than a person, who was there and saw it. I was there. I saw it. I was touched by it.
