

My picture present White House. This is a residence and workplace presidents of USA, which is located in Washington. Building was designed by Irish architect James Hoban. Consist with three central parts and four building conditions. I choose this building, because is the most impressive for me. This is spacious house, ornate at ideal size. Has a lot of ornaments and columns, which I love and is in graceful style. Design this house it joy. Next to building is a big garden, which together with house create beautiful place.
